

Building a Better Halton

January 10, 2022

Basement Flooding Mitigation Program Part B

Town of Oakville – Ward 2

Sewer back up
prevention

Notice of Planned Construction – PR-3042AE

January 2022

About This Project

Halton Region is planning to improve the wastewater collection system within Ward 2 in the Town of Oakville. The purpose of this project is to mitigate basement flooding risks by rehabilitating existing wastewater infrastructure. The project will take place along Taplow Crescent, with limits of the work identified in the attached map.

As we initiate the project design phase in January 2022, Halton Region staff will be surveying, locating and marking aboveground and underground infrastructure within this area. ***Please do not move or remove any stakes or paint markings from your property. Our staff will remove them once the survey work is completed.***

COVID-19 Update: Regional staff and contractors will be following health and safety guidelines set out by the Province and Public Health to help stop the spread of COVID-19. For more information, please visit halton.ca.
