**APPLICATION FORM:**

**Development Engineering Review Service – Request to Deviate From Regional Standard**

**APPLICANT INFORMATION**

Applicant Name:

Applicant Contact Information:

\_\_\_\_\_  
Email:

\_\_\_\_\_  
Phone:

Date of Submission

Regional Submission No.:

Engineering File No. :

Development Name and Phase

Address of Development/ Location  
Description:

Description of uses, number of  
units, built form types, etc.

Nature of Deviation(s)

\_\_\_\_\_  
Water

\_\_\_\_\_  
Wastewater

**INTERNAL REVIEW ONLY**

Assigned DPM:

Water & Wastewater System  
Services Review Staff

Please provide the design deviations summary and the details on each deviation with an attached site plan and schematic design for review and approval.

**Summary of Proposed Deviations from Halton Standards  
(Detailed explanation to be provided in next section.)**

APPLICANT INFORMATION				INTERNAL REVIEW ONLY Regional Approval			
Deviation #	Regional Standard Requesting Deviation (reference to standard number)  e.g. Deeper sanitary laterals to accommodate basement depths greater than 8 feet, LDM 3.8.7-Service Laterals	Brief description of deviation request	Critical Date for Resolution	Regional Approval (Accept Reject)	Name	Signature	Date
1							
2							
3							
4							
5							

**Deviation # 1**

**Applicant Rationale**

Please provide an outline of the location and extent of the deviation being requested. Please include a schematic highlighting the location(s) of the requested deviation on the site, including but not limited to, lots impacted, table showing USF slab elevation or max. depth of laterals @ PL, etc.

Please provide a detailed rationale for why the Regional standard cannot be met, what alternatives have been explored to meet the standard and why the deviation is required?

Please provide in detail how the objectives of the Regional standard(s) can be met through the proposed alternative design? Please include a discussion on anticipated operational and maintenance implications for the Region related to the deviation.

**FOR INTERNAL USE ONLY**

Location of context files, gaps to applicant rationale and risk management approach:

**Deviation #2**

**Applicant Rationale**

Please provide an outline of the location and extent of the deviation being requested. Please include a schematic highlighting the location(s) of the requested deviation on the site, including but not limited to, lots impacted, table showing USF slab elevation or max. depth of laterals @ PL, etc.

Please provide a detailed rationale for why the Regional standard cannot be met, what alternatives have been explored to meet the standard and why the deviation is required?

Please provide in detail how the objectives of the Regional standard(s) can be met through the proposed alternative design? Please include a discussion on anticipated operational and maintenance implications for the Region related to the deviation.

**FOR INTERNAL USE ONLY**

Location of context files, gaps to applicant rationale and risk management approach:

**Deviation # 3**

**Applicant Rationale**

Please provide an outline of the location and extent of the deviation being requested. Please include a schematic highlighting the location(s) of the requested deviation on the site, including but not limited to, lots impacted, table showing USF slab elevation or max. depth of laterals @ PL, etc.

Please provide a detailed rationale for why the Regional standard cannot be met, what alternatives have been explored to meet the standard and why the deviation is required?

Please provide in detail how the objectives of the Regional standard(s) can be met through the proposed alternative design? Please include a discussion on anticipated operational and maintenance implications for the Region related to the deviation.

**FOR INTERNAL USE ONLY**

Location of context files, gaps to applicant rationale and risk management approach:

**Deviation # 4**

**Applicant Rationale**

Please provide an outline of the location and extent of the deviation being requested. Please include a schematic highlighting the location(s) of the requested deviation on the site, including but not limited to, lots impacted, table showing USF slab elevation or max. depth of laterals @ PL, etc.

Please provide a detailed rationale for why the Regional standard cannot be met, what alternatives have been explored to meet the standard and why the deviation is required?

Please provide in detail how the objectives of the Regional standard(s) can be met through the proposed alternative design? Please include a discussion on anticipated operational and maintenance implications for the Region related to the deviation.

**FOR INTERNAL USE ONLY**

Location of context files, gaps to applicant rationale and risk management approach:

**Deviation # 5**

**Applicant Rationale**

Please provide an outline of the location and extent of the deviation being requested. Please include a schematic highlighting the location(s) of the requested deviation on the site, including but not limited to, lots impacted, table showing USF slab elevation or max. depth of laterals @ PL, etc.

Please provide a detailed rationale for why the Regional standard cannot be met, what alternatives have been explored to meet the standard and why the deviation is required?

Please provide in detail how the objectives of the Regional standard(s) can be met through the proposed alternative design? Please include a discussion on anticipated operational and maintenance implications for the Region related to the deviation.
