Basement Flooding Mitigation Project

Town of Oakville (Ward 2)

Sewer back up
prevention

Wastewater service
line(s) to property

Notice of Planned Construction – PR-3042W

Summer 2021

About This Project

IMPROVEMENTS

Halton Region is planning to enhance the wastewater collection system within Ward 2, Town of Oakville, to mitigate basement flooding risks (see attached map). The project area is planned to include Brookfield Crescent, Belvedere Drive, Stafford Drive, Sandbrook Road, Bridge Road, Warminster Drive, Valley Drive, Sandhurst Drive and Small Crescent. The construction of this project is tentatively scheduled to begin in the summer of 2021. A more detailed letter will be sent once the proposed construction dates are established.

As part of the project design process, over the summer and early fall, Halton Region staff will be surveying, locating and marking aboveground and underground infrastructure within this area. ***Please do not disturb or remove any stakes or paint markings from your property. Our staff will remove them once the survey work is completed.***

It may be necessary for our staff to enter your property to determine the elevation of your basement. Your permission will be requested prior to entry. Please note, all Regional staff carries photo identification.

COVID-19 Update: Regional staff and contractors will be following health and safety guidelines set out by the Province and Public Health to help stop the spread of COVID-19. For more information, please visit halton.ca.
